Marceli Pawliński

STUDENT / INDEPENDENT SOFTWARE BUILDER

Scotland, UK | marceli.dev | github.com/marceli1404

marceli@pawlinski.pl

Student and independent software builder in Scotland. I build web products, explore AI and cybersecurity, and learn by working through problems in real systems.

SELECTED INDEPENDENT PROJECTS

Zenith

Website monitoring and audit product connecting findings, evidence and practical fix prompts. Built with React and Cloudflare Workers, with D1, R2 and Queues supporting data, reports and background work.

zenith.me.uk

Prism

Education discovery and planning website bringing course research, university comparisons, career exploration and editable budgets into one journey. Visitors can begin without an account.

university.zenith.me.uk

Rosehill Pupil Voice

Independent feedback prototype with a share, review and private-reference journey, reading preferences and privacy guidance. Awaiting formal school approval.

rosehill-voice.web.app

OPEN SOURCE

Node.js / Undici - contribution #5606

Scheduling fix and regression tests for an idle keep-alive socket stall in the Undici HTTP client. Merged 29 July 2026.

github.com/nodejs/undici/pull/5606

TECHNICAL FOCUS

React; Cloudflare Workers, D1, R2 and Queues; browser automation; local language models; web reliability and cybersecurity.

EDUCATION AND LEARNING

Studying Maths and Computer Science in Scotland.

Selected learning: Cisco Networking Basics, Ethical Hacker and Introduction to Cybersecurity; IBM AI Literacy; Anthropic Building with the Claude API.

Full learning record and credential dates: marceli.dev/#certifications
